

NewTom™ Safe Beam™ Technology

Due to the cone shaped beam, radiation levels are reduced more than 45% compared to standard CT scanning.

NewTom, with patented Safe Beam™ technology automatically adjusts the radiation dose based on the patient's density!

With Safe Beam™ technology, a small child may appropriately receive up to 40% less radiation than a full size adult.

For Your Patients:

***45% LESS radiation than traditional CT scanning,
PLUS size-appropriate radiation***
